DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Bentley et al.

There is disclosed in Bentley a cartridge containing beverage ingredients, the cartridge comprising an inlet 26, an outlet 37, a storage chamber 21 having an inlet 28, a circumferential manifold 27; a lid 25, a filter 36, passages formed between ribs 38 and being located between the filter and a top of the cartridge, an outer member 20, and an inner member 37, 40.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bentley et al. in view of Rodth

Rodth discloses a disc-shaped beverage cartridge. It would have been obvious to one skilled in the art to construct the cartridge of Bentley in a disc shape as taught by

Art Unit: 1761

Rodth, in order to accommodate a different shape of a beverage device brewing chamber.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bentley in view of Rodth as applied to claim 11 above, and further in view of EPO 0449533.

The European document discloses four openings 13 within a wall of the cartridge. It would have been obvious to one skilled in the art to modify the cartridge of Bentley, as modified by Rodth, with that disclosed in EPO 0449533 and provide four liquid openings in the peripheral wall of the circumferential manifold, in order to slow the brewing time.

Claims 13-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bentley in view of Rodth as applied to claim 11 above, and further in view of EPO 0455337.

The European document discloses forty openings 13 within the wall of the cartridge. It would have been obvious to one skilled in the art to modify the cartridge of Bentley, as modified by Rodth, with that disclosed in EPO 0455337 and provide forty liquid openings in the peripheral wall of the circumferential manifold, in order to increase the brewing time.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Baecchi et al. is cited for its disclosure of the state of the art.
